SANDA KEKEZ - VESELIĆ

Prva crna pudla je došla u moj dom 1975 g. iz Njemačke, a 1979 kupujem apricot pudlu, od 1989 godine imam samo bijele pudle. Od 1980 godine sama šišam i izlažem pudle. Imam uzgajivačnicu bijelih patuljastih pudli Sandy-poodle koje izlažem, a sve bijele pudle koje su bile i jesu u mom vlasništvu su šampioni nekoliko zemalja.

Magistra sam poljoprivrede, a prvi stručni rad u vezan za kinologiju mi je bio diplomski rad pod nazivom "Morfološke karakteristike zubala njemačkih ptičara" 1990 godine. Kao mladi znanstvenik radim na Zborniku "Ovisnost fizioloških karakteristika (osobina) osjetila njuha pasmine Slovački kopov o biološkim supstratima u određenom staništu te o drugim unutaršnjim i vanjskim faktorima" 1992 godine.

Sudjelujem na 1. internacionalnom simpoziju "Scientific studies of hunting cynology" održanim od 03.12.1992 do 05.12.1992 u Osijeku. Bila sam vanjski suradnik na Poljoprivrednom fakultetu u Osijeku gdje sam držala predavanja iz kinologije. Držala sam predavanja lovcima u lovačkim društvima iz područja kinologije. Kinološki sudac sam od 1992 godine i sudac sam za sve pasmine u 9-toj FCI grupi. Upisala sam posljediplomski studij iz kinologije. U lokalnom kinološkom društvu sam učestvovala u organizaciji izložbi te bila na funkciji tajnika te u raznim odborima. Mnogi članci su mi objavljeni u kinološkim časopisima i na web stranicama. Zagovornik sam zdravlja kod pasa svih pasmina.

First black poodle came into my home in 1975 and it was purchased from Germany. In 1979 I bought one apricot poodle and since 1989 I have only white poodles. Dating from 1980 I am grooming and handling myself. I am an owner of the kennel registered in FCI named „Sandy-poodle“ under which I am breeding Poodles Nain White. All the poodles in my ownership are having champion titles of various countries.

I got masters degree in agriculture. My first expertise work related to the cynology was my graduate thesis in 1990 „Morphological characteristics of German Pointers dentition“. As a young scientist I have worked on the Book "Addiction of physiological characteristics (traits) of the sense of smell by Slovak kopov on biological substrates in a given habitat, and other internal and external factors" in 1992.

I participated on 1st International symposium "Scientific studies of hunting cynology" held from 3rd of December 1992 till 5th of December 1992 in Osijek. I was associate of the Faculty of Agriculture, where I lectured cynology. I gave presentations from the field of cynology to the hunters in hunting societies. I finished my exam for cynological judge in 1992 and now I am approved to judge the complete FCI group IX. I continued my education so I went to a postgraduate study of cynology. In local kennel club I have been involved in the organization of shows and I was on function of Secretary of the local club and in various committees. I had many articles published in magazines and on websites. I intercede health in dogs of all breeds.
