NEBOJŠA STANOJLOVIĆ

Psima se ozbiljno bavim od 1987 godine kada nabavljam svog prvog rotvajlera. Nakon toga, stigao je još jedan mužjak, Romul Mar-Ub, od koga su kasnije nastali mnogi visoko kvalitetni psi. Mogao bih reći da je eksterijerno a i karakterno bio rodonacelnik suvremenog tipa rotvajlera, moderne, velike i prelijepo glave kakva je i danas poželjna. Jedan od najboljih potomaka, njegov unuk, bio je Bronko od Dragicevica, zatim Amos meisterweg, multi sampion sa osvojenim petim mjestom na Klub Zigeru 1997 godine. Mnostvo parenja i stenadi, rezultiralo je jako dobrim potomstvom veoma cjenjenim u nasoj regiji i u svijetu.

2000 godine, položio sam za Republickog kinoloskog sucu, nakon dvije godine, za Saveznog i na kraju 2005 za medjunarodnog FCI suca za II i VIII grupu. Od 2000 te pa do danas, redovno sudim na domacim i medjunarodnim manifestacijama, u Evropi i nasem okruzenju, kao jednom i na Tajlandu 2009 godine.

Uzivam u svom hobiju, u sudjenju svih pasmina za koje sam položio, a posebno u rasi rotvajler, koju, kako sam rekao i uzgajam. Često i rado izlazem svoje pse kao natjecatelj, putujući po zemljama bivše Jugoslavije i Europe.

I am involved with dogs since 1987 when I purchase my first Rottweiler. After that, I am taking another male dog, whose name is Romul Mar-UB, producer of really quality dogs. I could even say that he was both by outline and character a prototype of modern Rottweiler with wonderful head which is even now desirable. He produced really nice dogs such as Bronko od Dragicevica and Amos Meisterweg (fifth place on Sieger 1997). He had huge number of studs and puppies which resulted with high quality offsprings respected in this region but also worldwide.

In 2000 I became judge on national basis while in 2005 I received my international licence for FCI groups II & VIII. Since that I judged on many dogshows in Europe including one judging appointment in far Thailand.

I am very much enjoying my hobby, especially when I am judging my own breed – Rottweiler. I am also showing my dogs a lot, in region and throughout Europe.
